a Humanistic reasons guide what intelligence is for

Standing and care

A whole life, including pain and rest

Truth and love

Concern joined to answerable inquiry

Plural lives and culture

Relationships, beauty, shared futures

b Experience can redirect both purposes and advanced means

Lived experience

affection · beauty
pain · curiosity

A revisable question

q_0 q_1

Lingji ↔ rational inquiry
revise ends or means

Outcome + chosen mode

make together
delegate
rest / receive care

Joint activity

work · culture · care
actual consequences

experience may change the aim

Action conditions: access, time, material support, obligations and affected people.

Nuwa

context, skills, learning
versioned self-revision

World / causal models

predict, rehearse, intervene
check against observations

Pangu

editable works + operations
build, change, test

Fuxi

joint execution
events + commitments

Chosen ends guide learning, prediction, production and execution; tools supply candidate means.

c Shared means can support futures their contributors did not choose

Selected from joint activity

tools + teaching + support
maintain, replace or let end

Later people, changed purposes

q_2

use · question · transform
or choose another route

Plural ways of living

different works and practices
no required return to the old aim

Civilizational scope: sustain usable access, willing care and room for cultural renewal.

Conditional on resources, institutions and burdens. Receiving care requires no contribution.

value reason — proposed operation ····→ conditional development *Argument, not measured causality*
